

ABDELHAK MIRBAH

Junior Data Engineer | Software Engineer

Casablanca, Morocco | +212 607 715 535 | Abdelmirbah@gmail.com
linkedin.com/in/abdelhak-mirbah | abdelhakmirbah.github.io/Portfolio

PROFESSIONAL SUMMARY

Recently graduated Software Engineer (State Engineering Degree in Computer Science and Networks, Software Engineering) with a focus on Data Engineering. Hands-on experience designing data pipelines, building ETL workflows, loading Data Warehouses and delivering BI reporting (Pentaho, Python, SQL, Power BI) through three internships, including a final-year project on automated financial consolidation. Seeking a Junior Data Engineer or Software Engineer position.

TECHNICAL SKILLS

Data Engineering: ETL (Pentaho), Data Pipelines, Data Warehouse, Data Modeling, Apache Kafka, Batch Automation

Languages: Python, SQL, Java, JavaScript, PHP

Databases: PostgreSQL, MySQL, Oracle

Analytics & BI: Power BI, Pandas, KPIs, Dashboards

Development: Flask, Spring Boot, React, HTML/CSS, Bootstrap

Tools & Methods: Git, GitHub, GitLab, Jira, Scrum, UML Modeling

PROFESSIONAL EXPERIENCE

Data Engineering Intern (Final-Year Project) | LEONI WS, Berrechid, Morocco | Mar 2026 – Sep 2026

- Designed and developed end-to-end an automated financial consolidation and reporting application (data pipeline and dashboards).
- Defined the software architecture of the solution and modeled the database.
- Automated data processing and optimized financial reporting (KPIs, dashboards).

Business Intelligence Intern | Daman Cash (BMCE Group), Casablanca, Morocco | Jul 2025 – Aug 2025

- Developed ETL workflows with Pentaho to load a Data Warehouse.
- Integrated multi-source data (ADRIA, HPS, MySQL, Oracle) and set up automated batch jobs.
- Automated processing and optimized financial reporting with Power BI dashboards (KPIs).

Web Developer Intern | Kazinov (Schneider), Morocco | Aug 2024 – Sep 2024

- Designed and developed a task-tracking application for project management (PHP, Bootstrap).
- Modeled the application's MySQL database.

PROJECTS

AI-Powered Fraud Detection | Dec 2025 | Spring Boot, Apache Kafka, ONNX

- Built a real-time fraud detection pipeline integrating an AI model (ONNX) for low-latency inference and anomaly analysis.

Smart Irrigation | Jun 2024 | Android, AI

- Built an Android application providing real-time irrigation recommendations based on weather data and an adaptive AI model (soil and plant type).

EDUCATION

State Engineering Degree in Computer Science and Networks (Software Engineering) | Moroccan School of Engineering Sciences (EMSI) | 2023 – 2026

Specialized Technician Diploma in Software Development | ISTA NTIC Sidi Maarouf | 2019 – 2021

CERTIFICATIONS

Programming OOP C++ (EPFL) | React Basics (Meta) | Java and Object-Oriented Programming (Penn Engineering) | Interactivity with JavaScript (University of Michigan)

LANGUAGES

Arabic: native | French: fluent, professional | English: intermediate, technical
